It enacted a series of laws and regulations to protect the right to education for citizens from different communities. Since the reform and opening up, China's education has developed rapidly and made remarkable achievements, which are mainly reflected in the popularization of nine-year compulsory education and the realization of mass higher education. 新中国的成立大大鼓舞了海外学子回国效力。他们克服了重重障碍，回到祖国。上世纪五、六十年代，许多在国外学习工程技术和实用科学的留学生回国后成为投身祖国建设的中坚力量。如今，随着国家的迅猛发展，回国已成为许多出国深造学子的首选。虽然科学没有国界，科学家却是有祖国的。他们把自己的爱国情怀融入了民族复兴的伟大事业之中。

Nowadays, with the rapid development of the country, returning to the motherland has become the first choice of many students who study abroad. Although science has no borders, scientists have the motherland. They have integrated their patriotism into the great cause of national rejuvenation.

E-commerce has undergone tremendous growth in recent years, accelerating the widespread application of electronic money. Electronic money is the currency which is used to pay by electronic means like a computer or mobile phone. The most typical example of it is WeChat Pay, a mobile device-based payment method that allows users to make transfers to others and make payments to merchants by linking their bank cards. Compared with the cash payment, it is more convenient and raises the social benefit, but it has an impact on the way the bank operates. Security has always been the biggest concern in the process of using electronic money, so it is required to establish a perfect electronic money payment system to ensure the security of payment.
